WORK EXPERIENCE

Concentrix Catalyst — Senior iOS Engineer

May 2025 - Present

- Lead onboarding for new iOS engineers and help establish team conventions across an existing codebase.
- Introduced architectural improvements to improve maintainability, reliability, and feature delivery.
- Reduced crash rate by 60% by rolling out async/await networking and structured concurrency safeguards.

iOS Engineer

August 2023 - May 2025

- Improved Jenkins CI pipelines, reducing PR build times by approximately 300%.
- Delivered iOS features across large client projects in health, public safety, and enterprise environments.
- Worked in a large cross-functional team to ship production features with high reliability and user impact.

NIB Health — iOS Engineer

May 2022 - August 2023

- Developed and maintained features across three production iOS apps.
- Partnered with Android engineers to deliver consistent cross-platform functionality.
- Expanded CI infrastructure through new machines and tooling, saving thousands of dollars per week in build costs.

Sports Entertainment Network — Junior iOS Engineer

Feb 2021 - May 2022

- Introduced Swift into a legacy Objective-C codebase, improving development speed and maintainability.
- Supported apps used by approximately 500,000 monthly active users, including direct customer bug triage.
- Built custom integrations with first-party APIs for complex audio and video app functionality.

PERSONAL PROJECTS

Bricksee— iOS App

February 2020 - Present

- Generated over 40M+ impressions through SEO optimisation
- Trained and deployed a custom YOLO object detector and colour classifier on-device via Core ML, enabling real-time LEGO piece recognition from photos.
- Developed finetuned LLM, and RAG engine to recommend sets to users in-app.

EDUCATION

Griffith University, Australia

2025 - 2027

Bachelor of Computer Science; Major in Data Science & Artificial Intelligence

St Bedes College, Mentone

2014 - 2019

Secondary school - VCE

Moorabbin Flying Services, Mentone

2018 - 2019

Diploma of Aviation

TECHNICAL SKILLS

Swift, SwiftUI, UIKit, Combine, Objective-C, Structured Concurrency, Core ML, Vision, Realm, Firebase, REST APIs, CI/CD, Jenkins, Fastlane, XCTest, Git, Javascript, Node.JS, App Store release management, modular architecture.
